

Increasing mitigation & financing ambitions through action on international transport

Friday, 7 June
18:30 – 20:00h, Room RAIL
Ministry of Transport
Bonn Climate Change Conference 2013

The side event will **debate** carbon pricing of international transport as a mechanism to increase mitigation and financing ambitions, while delivering on equity. It will focus on ways to ensure fair and effective carbon pricing of international aviation and shipping. New impact calculations will be presented for aviation.

Agenda & Panelists

1. Presentation

- **Mr Andre Stochniol**, IMERS

2. Views from the Panel

- **Negotiators/experts from certain countries**
and
- **Mr Erik Haites**, Margaree Consultants

3. Debate, including Questions and Answers

New aviation impact results

Example: Under the Rebate Mechanism (RM) proposal all ships and planes pay for their emissions. The country differentiation is achieved through apportioned rebates and financing provisions. Financing generated is for climate change action, including in the sector. RM can apply to any revenue-raising scheme.
